

MUHAMMAD SUHAIB

Full Stack Web Developer

Lahore, Pakistan | +92 319 477 6162 | mmsohaib617@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Full Stack Developer with 1+ year of freelance and internship experience specializing in Next.js, React, and TypeScript. Delivered 6+ production SaaS and client applications, including an international freelance project for an Australian client, spanning AI-powered systems, secure payments, and scalable dashboards.

TECHNICAL SKILLS

Frontend & Languages: React.js, Next.js, Tailwind CSS, Shadcn UI, Fabric.js, Chakra UI, JavaScript (ES6+), TypeScript

Backend & Auth: Node.js, Prisma ORM, REST APIs, Clerk, Better Auth, NextAuth.js

Databases: MySQL, MongoDB, Firebase, Supabase, Amazon RDS, PostgreSQL

Cloud, Payments & Tools: AWS Lambda, API Gateway, S3, Stripe, Pusher, UploadThing, ImageKit, Inngest, Recharts, jsPDF, Git, GitHub, Vercel

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer (Remote) — Self-Employed

Oct 2025 – Present

- Delivered a car rental management system for an Australian client (Sep – Nov 2025) using Next.js, Prisma, MySQL, Stripe, NextAuth, ImageKit/UploadThing, Nodemailer, Recharts, jsPDF, and html2canvas.
- Implemented an end-to-end booking flow, an admin dashboard with revenue analytics, automated PDF invoice generation, and email notifications for bookings and payments.
- Built and shipped web applications for local clients, including portfolio websites, an AI-powered video summary generator, and an event management system, independently handling requirements, development, and deployment.
- Managed direct client communication, project scoping, and delivery timelines across all freelance engagements, working full-time equivalent hours as a self-employed developer.

Junior Full-Stack Developer (Remote Internship) — NIT-Services, Lahore

Mar 2025 – Jun 2025

- Collaborated on production-grade client projects using scalable TypeScript and Next.js App Router architecture with optimized server/client rendering patterns.
- Improved codebase maintainability by converting repetitive UI sections into reusable components, and followed structured Git workflows for scalable team development.

PROJECTS

AI Recruiter Voice Agent — Final Year Project | Next.js · TypeScript · Vapi AI · Gemini AI · Prisma · MySQL · Stripe [GitHub](#)

- Built an AI-powered voice interview platform using Vapi AI and Gemini AI for fully automated candidate interviews and response evaluation.
- Developed an HR dashboard with AI response analysis, automated PDF ranking reports (jsPDF), and a Stripe credit-based payment system offering 5 free interviews on signup.

Graphic Design SaaS — Canva Clone | React · Fabric.js · NextAuth · MongoDB · UploadThing [Live](#) [GitHub](#)

- Built a feature-rich graphic design editor with 10+ canvas tools supporting AI image generation, freehand drawing, and complex object manipulation (rotation, layering) using Fabric.js.
- Engineered multi-format export (PDF, Word, PNG) with UploadThing cloud storage and a custom dashboard for managing saved designs.

Full-Stack Learning Management System (LMS) | Next.js · TypeScript · Prisma · Stripe · NextAuth [Live](#) [GitHub](#)

- Developed a dual-role platform with a Teacher Dashboard for course creation, video/document management, and real-time sales analytics; integrated Stripe for payments and NextAuth for role-based auth.
- Applied Prisma ORM indexing strategies that reduced database query latency by 20%, improving overall platform performance.

SaaS Task Management Platform — Trello Clone | Next.js · TypeScript · Prisma · MongoDB · Clerk [Live](#) [GitHub](#)

- Built a multi-organization Kanban board with drag-and-drop task management, dynamic Unsplash backgrounds, and full CRUD operations across boards, lists, and cards.

Text-to-PPT Generator | Next.js · TypeScript · Groq · ImageKit · Inngest [Github](#) — converts plain-text prompts into fully designed PowerPoint presentations.

Spotify Stats Analyzer | Next.js · Supabase · TypeScript · Shadcn UI — dashboard visualizing a user's top artists, tracks, and listening trends.

ACHIEVEMENTS

- Delivered 6+ full-stack SaaS and client applications spanning AI systems, payments, and dashboards across personal and freelance work.
- Completed and delivered an international freelance project (car rental management system) for an Australian client within a 2.5-month timeline.
- Reduced database query latency by 20% through Prisma ORM indexing optimizations on the LMS platform.

EDUCATION

BS Computer Science — University of Okara | CGPA: 3.40 / 4.0

2022 – 2026
